CAREER OBJECTIVE

MCA graduate with hands-on experience in Python, Django, JavaScript, React.js, and database-driven web development. Strong problem-solving skills with practical experience in developing responsive web applications. Seeking a Software Developer , Full-Stack Developer role to contribute to real-world projects and grow professionally.

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, Java, C, HTML, CSS
- **Frameworks & Libraries:** Django, React.js, Bootstrap, Tailwind CSS
- **Familiar With:** Next JS, TypeScript, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Chrome DevTools, MS Word, MS PowerPoint,

EXPERIENCE

Project Intern – Full-Stack Development
TechnoSoft, Kalaburagi | Jan 2026 – Aug 2026

- Gained hands-on experience in full-stack development through a **Logistics Services ERP live project**.
- Developed responsive front-end interfaces and database-driven backend functionality.
- Used **Python and Django** to develop and manage web application features.
- Implemented CRUD operations, authentication, session management, and role-based functionality.
- Worked with relational databases including **MySQL and SQLite**.
- Participated in development, debugging, testing, and feature enhancement activities.

Front-End: HTML, CSS, JavaScript , Bootstrap
Back-End: Python, Django
Databases: MySQL, SQLite.

Software Engineer Frontend (Intern)
Digisnare Technologies. Kalaburagi

- Developed responsive web layouts using HTML, CSS, and Bootstrap ensuring cross-device compatibility.
- Built reusable UI components (product cards, navigation bars) to improve development efficiency.
- Collaborated with team members and mentors to review code, implement feedback, and enhance project quality.
- Created and deployed a personal portfolio website showcasing skills, projects, and professional growth.

PROJECTS

Enhancing Fraud Detection in Banking by Integration of Graph Databases with Machine Learning. *2026*
Tech Stack: Python, Django, Neo4j, Scikit-learn, Cypher, HTML5, CSS3, JavaScript

- Developed an ML-based fraud detection system with Neo4j graph analysis.
- Used Cypher to identify suspicious transaction relationships and patterns.
- Built Django modules for fraud prediction, graph visualization, and reporting.

Employee Record System *2026*

Tech Stack: Python, Database Integration

- Built a CLI-based application for creating, updating, searching, and managing employee records with persistent database integration.
- Designed HR-like workflows focusing on data integrity and efficient CRUD operations.

Vehicle Breakdown Assistance Management System *2025*

Tech Stack: Python, Django, HTML, CSS

- Developed a full-stack web application enabling users to submit vehicle breakdown requests and connect with nearby service providers in real time.
- Implemented dynamic request management, location-based matching, and an intuitive user dashboard.

Stock Management System *2024*

Tech Stack: Java

- Built an inventory management application to track stock levels, process updates, and generate availability reports.

EDUCATION

Sharnbasva University, Kalaburagi *2024 – 2026*

Master of Computer Applications (MCA) — **CGPA: 8.92/10**

- Relevant Coursework: Data Structures, RDBMS, Web Technology, Software Engineering, Statistics

Khaja BandaNawaz University , Kalaburagi *2021 – 2024*

B.Sc — Computer Science & Physics — **CGPA: 7.89/10**

STRENGTHS

- Quick Learner
- Problem Solving
- Teamwork & Collaboration
- Effective Communication
- Leadership
- Adaptability

LANGUAGES

English (Proficient) | **Hindi** (Proficient) | **Kannada** (Native)
